

# 1) Executive summary

---

---

---

---

---

---

---

---

---

---

In this section, you have to write a short description of your project, to arouse the interest of your reader

## Example

This Marketing Plan concerns the launch of a new product on a new market which is quickly developing. The product is a special variety of apple, especially designed for the consumers of the planet Mars, who are increasingly interested in fresh products from Earth. This market is now accessible thanks to the development of interplanetary flights, but current exported products are simple Earth Planet products. It is instead possible to meet, in a more accurate way, the special need of Martian consumers, with a dedicated Marketing Plan.

# 2) Analysis of the situation and PEST

## Demand trends, social factors, psychographics

---

---

---

---

---

---

---

---

---

---

---

---

Here you have to summarise the results of your market analysis ( see dedicated chapter)  
It is very important to be honest, both if the document is for internal and for external use. Both potential benefits and drawbacks have to be outlined.

What are the **trends in demand** for your product or service? Is its demand seasonal? Where is it mostly purchased? How is it paid (card, cash, payments)? Can you envisage demand changes that can become opportunities for you?

**Who will buy your products?** Are you selling B2B (business - to - business) or B2C (business- to - consumer), or both? In each case, who decides which product to buy (e.g.: a housewife, a very busy working mother, a modern distribution buyer, the purchasing manager of a wholesaler...)

**Which specific characteristics will the buyers of your product have?** Age? Gender? Religion? Race? Education? Socio - economic condition? Type of household? Favourite point of purchase (internet or brick and mortar, mall or city center)? Favourite media? Main source of information and guarantee concerning food quality?

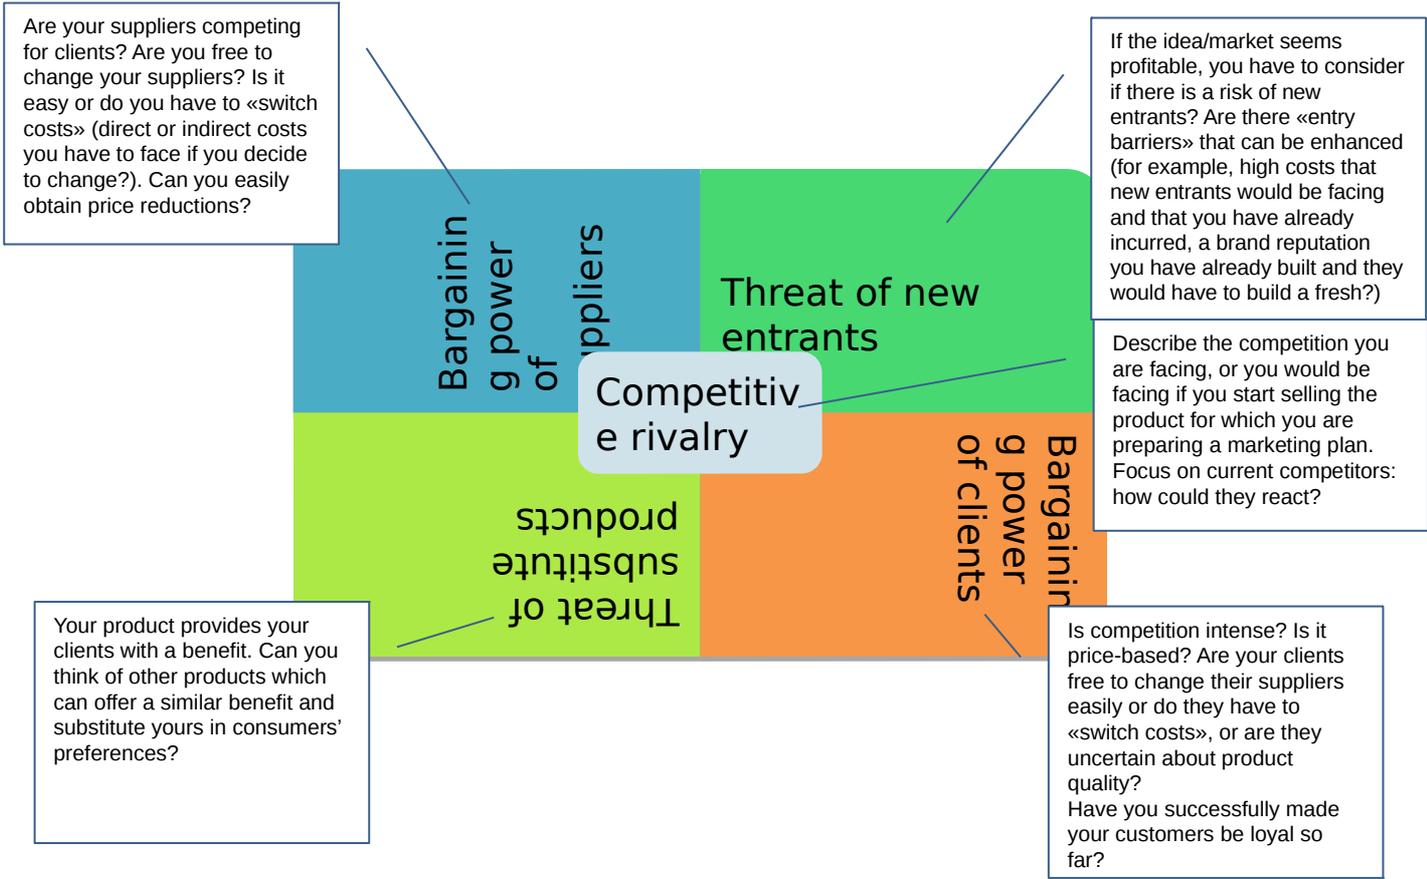

**What about your product's appeal?** Is it meant to substitute existing products or is it a new solution for a problem / need? In the first case, why should your product be bought instead of / in addition to existing ones?

Are you trying to increase the interest to a certain **social or cultural group**? Why do you think they will like your product?

**Is there any risk associated to the consumption of your product?** (e.g. recent alarming news, but also a particularly high price associated with inconstant quality, so that the risk of a bad consumption experience is perceived as high, if associated with the product's high price)

### 3) Competitive analysis: Porter's five forces

### Describe your competitors, and their strategies

---

---

---

---

---

---

---

---

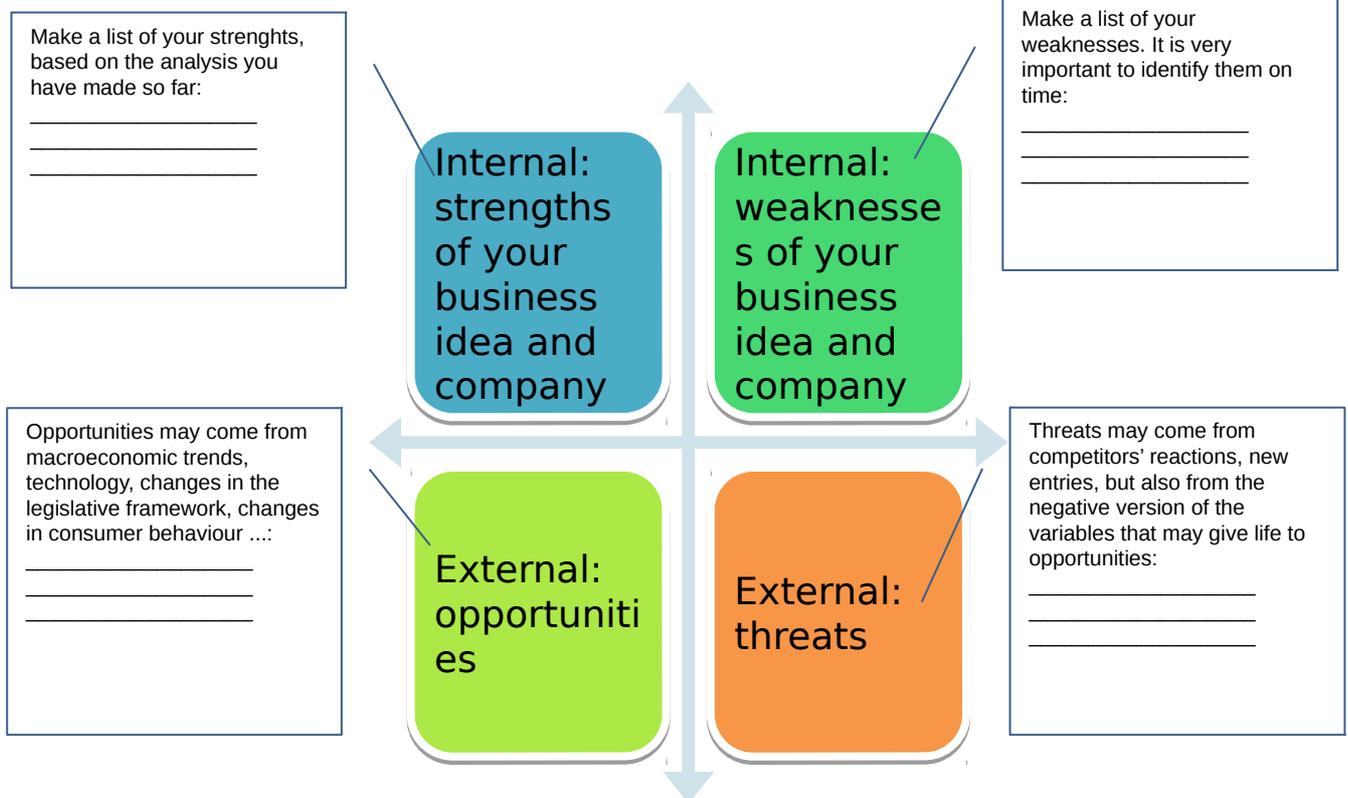

Who are your main competitors? In a concentrated market, you will have a few, big competitors. In fragmented markets, you may have types of competitors (e.g. smaller farms, bigger farms, farms located in a «famous» area, importers of Chinese products, etc.)

### 3) Competitive analysis: competitor analysis chart

Product: \_\_\_\_\_

Competitors and features	Feature 1:	Feature 2:	Feature 3:	Feature 4:	Feature 5:	Feature 6:	Price
Competitor 1: _____	Yes No	Yes No	Yes No	Yes No	Yes No	Yes No	
Competitor 2: _____	Yes No	Yes No	Yes No	Yes No	Yes No	Yes No	
Competitor 3: _____	Yes No	Yes No	Yes No	Yes No	Yes No	Yes No	
Competitor 1: _____	Yes No	Yes No	Yes No	Yes No	Yes No	Yes No	

### 3) Competitive analysis: SWOT

## Performance monitoring

How are you going to check if things are going well? What variables will you follow? Number of clients? Sales? Prices? And how frequently? Weekly? Monthly?

Variable	Method	Unit of measurement	Time period
Price	recording on a copybook; on a PC	In €/kg, €/unit, etc.	every month
Sales volumes			
Sales value			
Number of clients			
...			
...			
...			

**Your plan is ready.**

**Now, give it a smart look, and show it to your partners, employees, investors.**

**Of course, you can choose which parts you can show or hide each time ...**
